Level 1 – Adding (and subtracting) 1

You will need to make a number track to jump on. It could be pieces of paper numbered from 0 to 10 or chalk numbers on a patio.

Roll a 0 -9dice (or use the 0 to 9 spinner).

Jump on that number.

Roll the + and – dice (or turn over small pieces of card with + or - written on the back)

If you get + , jump on one ... what is your new number?

If you get – , jump one back …. what is your new number?
