<u>Computing</u> Coding  <u>French</u> Food Glorious Food 	<u>Music</u>  Sing Up! Latin <u>PE</u> Dance and Tennis  	<u>Personal Development</u> Created to Love Others and Journey in Love 

Year 3/4 Topic Homework - rolled over if you have not completed already. You can pick another challenge if you have already completed one!

As part of our Extreme Earth topic, please choose one of the following tasks to complete for homework (or you can come up with an idea of your own!)

- Research a natural disaster that can occur e.g an avalanche, and use the information gathered to write a report on this natural disaster.
- Write a poem about a volcano or earthquake.
- Research and write a fact sheet about either earthquakes or volcanoes.
- Find out about a volcano that has erupted. You can present your findings in a way of your choice.
- Find out about the Richter scale and produce a chart to inform people about the different strengths of earthquakes.
- Design a house suitable for an area where earthquakes occur often. Explain what you have included in your design to make it suitable.

We look forward to seeing the results and would like the children to bring their completed projects into school by the week beginning 9th February so that they can share and celebrate each others' achievements!
